

# Planes flying too low, too loud and too often over your neighborhood?

**The worst is yet to come with the completion of O'Hare Airport expansion in 2021.**

- Excessive noise and pollution are impacting the peace and health of hundreds of thousands of residents around O'Hare.
- Exposure to these levels of noise and pollution is linked to heart and respiratory disease.
- 5.5 million noise complaints in 2017 and no end in sight.

**Other cities (LA and Phoenix) have litigated and won. There are solutions, but we need your help.**

## What can you do?

- Visit our website to learn more about our solutions.
- Spread the word! Engage your neighbors. There is strength in numbers.
- File complaints with the City of Chicago:  
[chicagonoisecomplaint.com](http://chicagonoisecomplaint.com)

**Together, we can make a difference.**
